Inventor Morse, et al.
 Attorney's Docket No. HO43-001
 Title: Electronic Property Viewing System for Providing Virtual Tours Via a Public Communications Network, and a Method
 of Exchanging the Same

VERIFIED STATEMENT (DECLARATION) CLAIMING SMALL ENTITY STATUS
 (37 CFR 1.9(f) and 1.27(b)) - INDEPENDENT INVENTOR

As a below named inventor, I hereby declare that I qualify as an independent inventor as defined in 37 CFR 1.9(c) for purposes of paying reduced fees under section 41(a) and (b) of Title 35, United States Code, to the Patent and Trademark Office with regard to the invention entitled Electronic Property Viewing System for Providing Virtual Tours Via a Public Communications Network, and a Method of Exchanging the Same described in the specification filed herewith.

I have not assigned, granted, conveyed or licensed and am under no obligation under contract or law to assign, grant, convey or license, any rights in the invention to any person who could not be classified as an independent inventor under 37 CFR 1.9(c) if that person had made the invention, or to any concern which would not qualify as a small business concern under 37 CFR 1.9(d) or a nonprofit organization under 37 CFR 1.9(e).

Each person, concern or organization to which I have assigned, granted, conveyed, or licensed or am under an obligation under contract or law to assign, grant, convey, or license any rights in the invention is listed below:

- ☐ no such person, concern, or organization
☒ persons, concerns or organizations listed below

NOTE: Separate verified statements are required from each named person, concern or organization having rights to the invention averring to their status as small entities. (37 CFR 1.27)

NAME: Home Debut, Inc.

ADDRESS: 4603 N. Nevada, Spokane, WA 99207

☐ Individual ☒ Small Business Concern ☐ Nonprofit Organization

NAME:

ADDRESS:

☐ Individual ☐ Small Business Concern ☐ Nonprofit Organization

NAME:

ADDRESS:

☐ Individual ☐ Small Business Concern ☐ Nonprofit Organization

I acknowledge the duty to file, in this application or patent, notification of any change in status resulting in loss of entitlement to small entity status prior to paying, or at the time of paying, the earliest of the issue fee or any maintenance fee due after the date on which status as a small entity is no longer appropriate. (37 CFR 1.28(b))

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application, any patent issuing thereon, or any patent to which this verified statement is directed.

Inventor Morse, et al.
Attorney's Docket No. HO43-001
Title: Electronic Property Viewing System for Providing Virtual Tours Via a Public Communications Network, and a Method
of Exchanging the Same

VERIFIED STATEMENT (DECLARATION) CLAIMING SMALL ENTITY STATUS
(37 CFR 1.9(f) and 1.27(c)) - SMALL BUSINESS CONCERN

I hereby declare that I am

- ☐ the owner of the small business concern identified below:
☒ an official of the small business concern empowered to act on behalf of the concern identified below:

NAME OF CONCERN: Home Debut, Inc.
ADDRESS OF CONCERN: 4603 North Nevada, Spokane, WA 99207

I hereby declare that the above identified small business concern qualifies as a small business concern as defined in 13 CFR 121.3-18, and reproduced in 37 CFR 1.9(d), for purposes of paying reduced fees under section 41(a) and (b) of Title 35, United States Code, in that the number of employees of the concern, including those of its affiliates, does not exceed 500 persons. For purposes of this statement, (1) the number of employees of the business concern is the average over the previous fiscal year of the concern of the persons employed on a full-time, part-time or temporary basis during each of the pay periods of the fiscal year, and (2) concerns are affiliates of each other when either, directly or indirectly, one concern controls or has the power to control the other, or a third party or parties controls or has the power to control both.

I hereby declare that rights under contract or law have been conveyed to and remain with the small business concern identified above with regard to the invention, entitled Electronic Property Viewing System for Providing Virtual Tours Via a Public Communications Network, and a Method of Exchanging the Same by inventor(s) Stacy J. Morse, Anne M. Morse, and Eugene H. Dierks III, described in the specification filed herewith.

If the rights held by the above identified small business concern are not exclusive, each individual, concern or organization having rights to the invention is listed below* and no rights to the invention are held by any person, other than the inventor, who would not qualify as an independent inventor under 37 CFR 1.9(c) if that person made the invention, or by any concern which would not qualify as a small business concern under 37 CFR 1.9(d) or a nonprofit organization under 37 CFR 1.9(e). *Note: Separate verified statements are required from each named person, concern or organization having rights to the invention averring to their status as small entities. (37 CFR 1.27)

**ELECTRONIC PROPERTY VIEWING SYSTEM FOR
PROVIDING VIRTUAL TOURS VIA A PUBLIC
COMMUNICATIONS NETWORK, AND A METHOD
OF EXCHANGING THE SAME**

* * * * *

INVENTORS

**Stacy J. Morse
Anne M. Morse
Eugene H. Dierks III.**

ATTORNEY'S DOCKET NO. HO43-001

1 **ELECTRONIC PROPERTY VIEWING SYSTEM FOR PROVIDING**
2 **VIRTUAL TOURS VIA A PUBLIC COMMUNICATIONS NETWORK,**
3 **AND A METHOD OF EXCHANGING THE SAME**

4 **TECHNICAL FIELD**

5 This invention pertains an electronic property viewing system for
6 providing virtual property tours through a public communications network,
7 the system allowing consumers to tour real and personal property, and
8 wherein affiliates themselves may independently access, input and edit the
9 property tour data sets and photographs.

10 **REFERENCE TO MICROFICHE INDEX**

11 Pursuant to 37 C.F.R. 1.96, this specification includes a microfiche
12 appendix which is filed herewith, comprising two microfiche cards, labeled
13 as appendix electronic property viewing system 1 of 2, and appendix
14 electronic property viewing system 2 of 2. The microfiche contains eighty
15 five pages of computer source code comprising one embodiment of the
16 computer readable instructions which may be used to practice an
17 embodiment of this invention, and which are hereby incorporated into this
18 specification by this reference.
19
20
21
22
23

BACKGROUND OF THE INVENTION

The more recent acceptance and use of public communications networks such as the internet, has provided a network or system through which the viewing of both real and personal property may be accomplished in a much more efficient and desirable way than has ever previously been provided or available. The increased ability to handle larger amounts of data and information over the internet has further allowed more graphical images to be presented to the viewer, which facilitates much more effective presentations or tours to users of the internet.

While there have been prior attempts to make available the viewing of still photographs of property over the internet, the prior systems have typically required that a photographer be hired on behalf of the company providing the website, who must go to the property to take photographs. The website company then posted the one or more still photographs on the website, and later input text describing the still photographs.

These prior systems therefore have a relatively high cost in the commercial creation of the photographs, and then in their placement on the website of the website company. The prior systems also took an unjustifiably long amount of time before the photographs of the property were available to viewers or potential purchasers.

1 It is therefore an object of an embodiment of this invention to
2 provide a property viewing system wherein affiliates, such as real estate
3 agents or property owners (in the real estate embodiments of this invention),
4 property managers (in the rental property embodiments of this invention),
5 or the property management companies & owners (in the vacation rental or
6 room rental embodiments of this invention), may take their own
7 photographs and upload the images along with the desired data sets to the
8 website, thereby constructing their own virtual tour which would be
9 available immediately or in real-time.

10
11 In the typical prior systems the viewer accessing a property viewing
12 website over the internet would find one or more photographs on the first
13 page for that property unit, but typically must then move from new page
14 to new page in order to view the plurality of photographs of the property.
15 In order to go back to a prior view of the property to look at it a second
16 time and to look at other pages which contain other photographs of the
17 property, the user must typically click on the back button on his internet
18 browser. Requiring a user to continually go back to the start page for a
19 series of photographs or images makes the tour more tedious and less
20 desirable for the user. This becomes a relatively slow process and does not
21 provide a sufficiently easy or desirable virtual tour of the property.
22
23

1 It is therefore an object of an embodiment of this invention to
2 provide a property viewing system in which the viewer may take a virtual
3 tour of property while staying on the same reference page, and further
4 which provides the index, tabs or other selection means to directly go to
5 each of the other multiple views of the property from the same page.
6 Some of the embodiments of this invention have the advantage of providing
7 a tab system which allows the user to view or access any one of the tour
8 views or pages from any one of the tour views or pages, significantly
9 reducing the amount of time to take a complete virtual tour, and making it
10 more pleasing to the consumer.

11
12 In most property viewing situations, merely providing small single
13 shot still photographs does not make the best presentation of the property
14 being viewed. It is much more desirable to provide larger photographs,
15 panorama photographs or movable photographs, which allow the potential
16 customer or viewer to see a more complete view of the property, and to
17 control the movement of the photograph or the view of the property.
18 Providing panorama photographs also gives the viewer more of a feeling or
19 belief that he or she is actually taking a tour of the property, and turning
20 their head or looking around the property unit, as opposed to merely
21 looking at a still photograph.
22
23

1 A feature of one embodiment of this invention therefore provides a
2 virtual property viewing or tour system, which provides one or more
3 panorama or movable photographs. Text and/or still photographs may be
4 combined with the movable photographs as part of the same virtual tour.

5 There are numerous different embodiments for which this invention
6 may be used, such as without limitation, providing virtual tours of real
7 property for sale or lease, virtual tours of vacation properties and virtual
8 tours of vehicles, virtual tours of art or museums using movable
9 photographs; to name but a few examples.

10 There is not currently a sufficiently versatile website which contains
11 a virtual tour of real property, with options of having a movable photograph
12 with a three hundred sixty degree range, a movable photograph having less
13 than a three hundred sixty degree range, and still photographs, in the same
14 virtual tour. With the varying types of photographs and photographic
15 capabilities of affiliates and potential affiliates, this type of flexibility is
16 long overdue. It is therefore an object of this invention and a feature of
17 one embodiment of the invention to provide a virtual tour site which is
18 versatile enough to optionally provide a movable photograph with a three
19 hundred sixty degree range, a movable photograph having less than a three
20 hundred sixty degree range. It is a still further object to provide such a
21 site which additionally provides the option for still photographs.
22
23

BRIEF DESCRIPTION OF THE DRAWINGS

Preferred embodiments of the invention are described below with reference to the following accompanying drawings:

Figure 1 is a flowchart block diagram overview of the property viewing system in relation to the internet and client computers;

Figure 2 is a process flow diagram of an embodiment a property viewing system as contemplated by this invention;

Figure 3 is a block depiction of a diagram of an embodiment of a start page or home page screen display, as shown more fully in Figures 4A and 4B;

Figure 4A is a partial diagram of the Home Page screen display for one embodiment of the electronic property viewing system contemplated by this invention;

Figure 4B is a partial diagram of the lower portion of the Home Page screen display for the embodiment of the electronic property viewing system contemplated by this invention and shown in Figure 4A;

Figure 5 is a block depiction of a diagram of a Sign Up screen display for an embodiment of the electronic property viewing system contemplated by this invention, wherein new clients or

1 affiliates, input personal information to create a new account,
2 and as shown more fully in figures 6A, 6B and 6C;

3 Figure 6A is a partial diagram of a Sign Up screen display represented in
4 Figure 5;

5 Figure 6B is a partial diagram of the sign up screen display represented
6 in Figure 5;

7 Figure 6C is a partial diagram of the sign up screen display represented
8 in Figure 5;

9 Figure 7 is a block depiction of a diagram of a Login screen display
10 which may be used in an embodiment of this invention,
11 wherein existing clients or affiliates input their unique
12 information such as email address and password, and as shown
13 more fully in figures 8A and 8B;

14 Figure 8A is a partial diagram of the login screen display represented in
15 Figure 7;

16 Figure 8B is a partial diagram of the login screen display represented in
17 Figure 7;

18 Figure 9 is a block depiction of a diagram of a Modify a Tour screen
19 display which may be used in an embodiment of this invention,
20 wherein existing affiliates input their unique information such
21
22
23

as email address and password, and as shown more fully in figures 10A and 10B;

Figure 10A is a partial diagram of the Modify a Tour screen display represented in Figure 9;

Figure 10B is a partial diagram of the modify a tour screen display represented in Figure 9;

Figure 11 is a block depiction of a diagram of a main tour editing screen display which may be used in an embodiment of this invention, wherein existing clients or affiliates choose in which way to input, access, or update information within their account, as more fully shown in figures 10A and 10B;

Figure 12A is a partial diagram of the main tour editing screen display represented in Figure 11;

Figure 12B is a partial diagram of the main tour editing screen display represented in Figure 11;

Figure 13 is a block depiction of a diagram of the Contact Information screen display which may be used in an embodiment of this invention, wherein the affiliate or agent may input personal, business or advertising data and photographs for their use of the system, as more fully shown in figures 14A, 14B and 14C;

1 Figure 14A is a partial diagram of the contact information screen display
2 represented in Figure 13;

3
4 Figure 14B is a partial diagram of the contact information screen display
5 represented in Figure 13;

6 Figure 14C is a partial diagram of the contact information screen display
7 represented in Figure 13;

8 Figure 15 is a block depiction of a diagram of a Tour Counter, or hit
9 counter, screen display which may be used in an embodiment
10 of this invention, wherein the affiliate or agent may obtain
11 information about the number of visits or hits on each of his
12 or her property units for which virtual tours are provided, as
13 more fully shown in figures 16A and 16B;

14
15 Figure 16A is a partial diagram of the hit counter screen display
16 represented in Figure 15;

17 Figure 16B is a partial diagram of the hit counter screen display
18 represented in Figure 15;

19 Figure 17 is a block depiction of a diagram of a Quick Edit tour display
20 which may be used to allow the agent or affiliates to edit the
21 most commonly changed fields in a given property tour, and
22
23

from which open houses or other scheduled items may be scheduled, as more fully shown in Figure 18A and 18B;

Figure 18A is a partial diagram of the Quick Edit tour screen display represented in Figure 17;

Figure 18B is a partial diagram of the Quick Edit tour screen display represented in Figure 17;

Figure 19 is a diagram of a Schedule Open House screen display which may be used to allow the affiliate to schedule an open house and thereby notify potential customers as well;

Figure 20 is a diagram of a Schedule Open House screen display wherein an open house date has been input by the affiliate in the template containing part of the data set for the property unit;

Figure 21 is a block depiction of a diagram of the Quick Edit tour screen display with the open house scheduled in Figure 20 teen shown on the Quick Edit tour screen display;

Figure 22A is a partial diagram of the edited Quick Edit tour screen display represented in Figure 21;

Figure 22B is a partial diagram of the edited Quick Edit tour screen display represented in Figure 21;

Figure 23 is a partial diagram of a Terms and Conditions of Use screen display which may be used in an embodiment of this invention,

and a which would be encountered by a user selecting the Create a New Tour menu item from the screen display depicted in Figure 18A (or others with the same menu item selection);

Figure 24 is a block depiction of a diagram of a checklist for the creation of a new tour which the affiliate reviews before proceeding to create a new property virtual tour, as more fully shown in figures 25A, 25B and 25C;

Figure 25A is a partial diagram of the checklist for the creation of a new tour represented in Figure 24;

Figure 25B is a partial diagram of the checklist for the creation of a new tour represented in Figure 24;

Figure 25C is a partial diagram of the checklist for the creation of a new tour represented in Figure 24;

Figure 26 is a diagram of a "Creating a New Tour" screen display which may be used in an embodiment of this invention, wherein the affiliate inputs basic information to initiate the creation of a new virtual tour within the contemplation of this invention, and after accepting the Terms and Conditions of Use as more fully set forth in Figure 23;

Figure 27 is a block depiction of a diagram of the main tour information editing screen display which may be used in an embodiment of

1 this invention, and which would be encountered by a user
2 desiring to create a new virtual tour or by a user desiring to
3 edit an existing virtual tour, as more fully shown in Figures
4 28A, 28B and 28C;

5 Figure 28A is a partial diagram of the main tour information editing screen
6 display represented in Figure 27;

7 Figure 28B is a partial diagram of the main tour information editing screen
8 display represented in Figure 27;

9 Figure 28C is a partial diagram of the main tour information editing screen
10 display represented in Figure 27;

11 Figure 29 is a block depiction of a diagram of the main tour information
12 editing screen display, showing the partial input of property
13 information and further showing the drop-down menu selections
14 for "Property Type", which may be used in an embodiment of
15 this invention, as more fully shown in figures 30A, 30B, and
16 30C;

17
18 Figure 30A is a partial diagram of the main tour information editing screen
19 display represented in Figure 29;

6 display wherein the affiliate initiates the purchase of the virtual
7 tour, selects advertising and methods of providing data or
8 photographs, as more fully shown in Figures 51A and 51B;

9 Figure 51A is a partial diagram of the purchase screen display represented
10 in Figure 50;

11 Figure 51B is a partial diagram of the purchase screen display represented
12 in Figure 50;

13 Figure 52 illustrates an embodiment of a Tour Invoice screen display
14 which may be printed by the affiliate, and which provides basic
15 information regarding the tour, as more fully shown in Figures
16 53A, 53B and 53C;

17 Figure 53A is a partial diagram of the Tour Invoice screen display
18 represented in Figure 52;

19 Figure 53B is a partial diagram of the Tour Invoice screen display
20 represented in Figure 52;

1 Figure 53C is a partial diagram of the Tour Invoice screen display
2 represented in Figure 52;

3 Figure 54 is a figurative illustration of one way to provide a movable
4 photograph as part of a virtual tour contemplated by an
5 embodiment of this invention;

6 Figure 55 is a representation of a panoramic photograph which has been
7 stitched or spliced, and which shows the relative area of the
8 viewing window to the entire panoramic photograph;

9 Figure 56 is a diagram showing how locating the computer mouse pointer
10 causes the movable photograph to move;

11 Figure 57 is an embodiment of a screen display which would preferably
12 be used as a first page in a virtual tour, within the
13 contemplation of this invention;

14 Figure 58 is an embodiment of a screen display which may be used as
15 a page or display in a virtual tour, within the contemplation of
16 this invention;

17 Figure 59 is an embodiment of a screen display which may be used as
18 a page in a virtual tour, within the contemplation of this
19 invention, figuratively illustrating a movable photograph;
20
21
22
23

1 Figure 60 is an embodiment of a screen display which may be used as
2 a page in a virtual tour. within the contemplation of this
3 invention;

4 Figure 61 is a block diagram illustrating the exchange of time units in
5 consideration for a virtual tour posting on a website;

6 Figure 62 is a pop-up window screen display of an Insert Photo which is
7 prompted by selecting or clicking on the Upload Photo buttons
8 described herein, giving the affiliate the option to either
9 directly upload the photograph or to email it as an attachment
10 to the virtual tour web site;

11 Figure 63 is a pop-up window screen display of an Pick a Photo which
12 is prompted by selecting or clicking on the Email a Photo
13 button shown in Figure 62;

14 Figure 64 is a pop-up window screen display of a second Pick a Photo
15 screen which is prompted by selecting the "Pick an E-mailed
16 Photo" button in Figure 63; and

17 Figure 65 is a pop-up window screen display of a Panorama Mode page
18 wherein the affiliate must identify the nature of the photograph
19 selected.
20
21
22
23

DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENTS

Reference will now be made to a preferred embodiment of the Applicants' invention. One exemplary implementation is described below and depicted with reference to the drawings comprising an electronic property virtual tour system for use on a public network such as the internet. While the invention is described via a preferred embodiment, it is understood that the description is not intended to limit the invention to this embodiment, but is intended to cover equivalents and modifications such as are included within the scope of the appended claims.

Further, due to the nature of the level of skill in the art, there may be various menu items, explanatory text, buttons, menus, routines, subroutines, source code, display configurations which are known or may readily be duplicated by known programming means by one skilled in the art, and they will not therefore be described in significant detail.

The term photograph as used herein is used in a broader sense than its normal definition, to include without limitation, traditional photographs, photographic images, digital photographs, electronic depictions of photographs, video taped segments, digitized photographs, digital and manipulated photographs, and any other image which is derived from, or based on, a photograph.

1 The term "movable photograph" as used herein means a photograph,
2 as defined above, and which is caused to move or appear to move within
3 the viewer window, to allow more of the photograph to be seen than is
4 shown in the viewer window. In this case if a given photograph is larger
5 than the viewer photograph window, it may be designated as such when
6 being input, and it is the selection during input that determines whether the
7 embodiment of this invention, creates a movable photograph or picture,
8 versus a still photograph.

9 The term panorama or panoramic as used herein in connection with
10 photographs, in addition to its traditional definitions, is used herein for
11 photographs which are larger than the viewer photograph window (either
12 vertically or horizontally), which is typically measured in pixels.

13 The term "affiliate" as used herein is intended to broadly apply to any
14 person or entity authorized to create or modify virtual tours of property
15 units, examples of which for various embodiments of this invention,
16 including without limitation: real estate agents listing real property and
17 rental/lease property; resorts; property managers; sellers of vehicles;
18 hotel owners; travel agents; travel promoters; chambers of commerce;
19 visitors bureaus; and others.

20 The term "property" or "property unit" as used herein is intended to
21 cover not only what is traditionally considered real property, but also,
22
23

1 without limitation, time share interests, condominium interests, motel rooms,
2 hotel rooms, resorts, golf courses, and bed and breakfast facilities, to name
3 but a few. The term property unit also includes all types and kinds of
4 personal property such as, without limitation, automobiles, trucks,
5 recreational vehicles, airplanes, artwork, to name just a few.

6 The term "template" as used herein in relation to the format of a
7 virtual tour of a given screen display is used in a broad sense to include
8 a form, framework, report form, format or other electronic or screen display
9 structure for the input, editing or presentation of a virtual tour.

10 While the preferred embodiment is described and used in connection
11 with the internet and the world wide web, the term communications network
12 or public communications network as used herein is meant in its broadest
13 sense to include these and all other current and future communication
14 networks, including public packet switched communications networks, and
15 the current or future internet.

16
17 Figure 1 illustrates a preferred embodiment of Applicants' invention
18 wherein a basic system configuration is provided for an electronic property
19 virtual tour system for use on a public communications network, which is
20 identified as reference numeral 100. An online network 102 is provided in
21 one form as the internet 104, and more particularly as the World Wide Web
22 (WWW). Network 102 is part of a network environment, or networked
23

1 computer system 108. Networked computer system 108 includes a web
2 server computer 110, one or more client or host computers 112, and an
3 online network 102. Client computers 112 would typically have a web
4 browser 114 and may also include a web document 116.

5 It will be appreciated by those skilled in the art that the web server
6 110 illustrated may be one or more such servers connected by known means
7 local or remote from one another.

8 There will further be one or more affiliate computers 117, which
9 would be connected to the internet 104 and through which the affiliate may
10 create or edit virtual tours.

11 In an embodiment of this invention, the affiliate may have his or her
12 own website which is accessed over the internet by clients or prospective
13 clients of affiliate (or potential purchasers/lessees of the property units).
14 Figure 1 illustrates an affiliate server computer 800, affiliate web server
15 801, affiliate website 802, affiliate webpage 803 and affiliate property unit
16 listings 804, all of which are connected to the public communications
17 network, which in this embodiment is the internet.

18 A feature of one embodiment of this property viewing system to
19 affiliates is that customers who visit the affiliate's web site 802 will be
20 returned to that web site after viewing the virtual tour selected from the
21 affiliates site. For instance, a potential client of the affiliates may be
22
23

1 viewing a list of property units on the affiliates's web site 802 and click
2 on a particular property unit to see a virtual tour. This will link the client
3 to web site 122 where the one or more memory areas store the virtual
4 tour. The one or more memory areas may also be located on linked or
5 electronically connected computers, sites or memory areas, and they need not
6 be physically near one another.

7 Once done with the virtual tour, the client may select or click on the
8 Back to Your List button 851 or link (shown on the sample tour illustrated
9 in Figure 57, and others), and be returned to the affiliates web site without
10 the need to repetitiously hit the back button of the client's internet browser.

11 More particularly, Web server computer 110 is a hardware component
12 that serves codes and data to the WWW. Web server computer 110
13 includes a web server 118 comprising a software program that receives,
14 manages, and responds to client requests for web documents and files. Web
15 server 118 includes a central electronic property viewing system 120 in
16 which a virtual property tour may be viewed by client computers 112. The
17 virtual tour is carried out pursuant to the electronic property viewing system
18 100.
19

20 Website 120 includes web page 122 and virtual property tour memory
21 area 124. Web page 122 comprises a unit of information in a form of a
22 data unit, that may include text and/or graphics. The unit of data or data
23

1 unit is presented on a screen out of client computer 112 to a user, such as
2 to an individual searching for property or desiring to virtually tour real or
3 personal property.

4 Individual web pages are active and may include buttons, icons and/or
5 links, which are all well known in the art and which will be referred to
6 herein as triggers. Triggers enable the launching of application software
7 programs and/or access or links to other pages. Virtual property tour
8 memory area 124 comprises the collective memory area allocated for part
9 or all of property unit data sets, on the web server computer 110.

10
11 The term memory areas as used herein is intended to cover any area
12 with temporary or permanent memory capabilities, including any memory
13 storage mediums, such as a computer hard drives, disks, data storage
14 devices, and others as set forth below.

15 For purposes of this disclosure, it is understood that memory generally
16 refers to a data storage device resident within or associated with a
17 computer, such as a random access memory (RAM). As utilized herein,
18 memory is intended to refer to any form of storage medium associated with
19 a computer, such as a data storage device, and including hard disk drives
20 (HDDs), semiconductor memories and addressable storage spaces present
21 within a processing unit or other internal storage devices that are used to
22 execute instructions and/or store data and addresses, or any other form of
23

memory as presently understood within the art, or which may later be developed. Furthermore, it is understood that memory can be physically subdivided into units such as a first memory area, a second memory area, and a third memory area. Such units are not necessarily physically associated, but can be associated via the ability to address and/or locate such memory areas.

As shown in Figure 1, it is understood that client computer 112 is a general-purpose machine that processes data via a set of instructions that is stored in a data storage device, such as memory or a memory area. The computer server components comprise hardware on which one or more software programs are implemented.

The typical hardware includes a processor or microprocessor; a hard disk drive; screen displays; input devices such as a keyboard and/or a mouse; and other associate components which are well understood and known in the art.

Additionally, Web server computer 110 includes hardware such as one or more processors, or microprocessor; one or more data storage devices, such as a hard disk drive ("HDD"); memory, such as random access memory ("RAM"); and an interface device, such as a display, a keyboard and/or a mouse.

1 According to one implementation of Applicants' invention, web server
2 computer 110 comprises two servers which are identical in hardware, each
3 machine having 300MHz Intel Pentium II processors, 256MB of
4 100MHzRAM, and a 13GB IDE hard drive. Both machines are running
5 Windows NT4.0 (with the service pack 5 update). One server is the data
6 warehouse server (includes memory area), and it has Microsoft SQL 6.5
7 installed thereon. The second server is the web server (includes memory
8 area), which is running Microsoft Internet Information Server (IIS) 4.0, and
9 a host of third party add-ons (server objects), including: SA-Fileup, v2.0.3.8
10 by Software Artisans, AspMail, v3.0.2 by ServerObjects.com, AspImage,
11 v1.9 by ServerObjects.com, AspHTTP, v3.0.2 by ServerObjects.com, AspInet,
12 v2.0 by ServerObjects.com, ImgSize, v1.1.1 by ServerObjects.com and
13 Counter, and v5.2 by Henn Saar.

15 A variety of programming languages are used in this system. For
16 server-side processing, Microsoft's Active Server Pages (ASP) is used, and
17 is included in the Microsoft Internet Information Server. For client side
18 technologies, HTML, DHTML, Java (applets) and JavaScript are utilized.
19 It will be appreciated by those skilled in the art that the foregoing is to
20 disclose the preferred embodiment, and that there would be numerous
21 alternatives and combinations of alternatives available.
22
23

1 Figure 2 is a process flow diagram of one embodiment of a property
2 viewing system as contemplated by this invention, and which is an
3 embodiment for application over the internet. Step P1 is a representative
4 home page for which an exemplary home page for an internet embodiment
5 is shown more fully in Figures 3, 4A and 4B. Step P2 is a Log-in screen
6 display for authorized users or affiliates to enter personal data to gain
7 access to the input, or editing portion of the viewing system. Figures 7,
8 8A and 8B illustrate an internet embodiment of step P2.

9 Step P3 is a Sign-Up screen display for persons who are not yet
10 authorized to access, create and/or edit the viewing system. Figures 5, 6A,
11 6B and 6C show a representative internet embodiment screen display
12 representing step P3.

13 An affiliate or a potential affiliate would typically access the home
14 page of the virtual tour service provider. In order for the affiliate to
15 proceed to access, create or edit virtual tours, he or she would choose step
16 P2 or step P3 to either log in if he or she is already an authorized user,
17 choose step P3 to sign up and thereby become authorized to enter step P4.

18 Step P4 is the main tours editing screen display, and an internet
19 embodiment of step P4 is illustrated in Figures 9, 10A and 10B.

20 From step P4, the affiliate may review a Tour Hit Counter screen
21 display, represented by step P5, and an internet embodiment of which is
22
23

1 more fully illustrated in Figures 15, 16A and 16B, which allows the affiliate
2 to ascertain the number of times each of the listed virtual tours has been
3 accessed.

4 Also from the main tour editing screen display, the affiliate may enter
5 affiliate contact information via step P6. An internet embodiment of step
6 P6 is more fully illustrated in Figures 13, 14A, 14B and 14C.

7 As can be seen at step P6, the Contact Information screen display,
8 at this point an affiliate may choose to upload company logo 1 (step P7),
9 upload company logo 2 (step P8), or provide the data which will comprise
10 the contact information within step P6. The contact information data may
11 include a photograph of the affiliate or affiliates, as represented by step P9.
12

13 As will be seen below from the feature of this invention which
14 creates electronic property unit brochures, the company logo which may be
15 entered in step P7 or step P8 may be chosen based upon the desired result
16 in the various styles of brochures, which may be created concurrently with
17 the virtual tour. At step P9, the affiliate may upload photographs which
18 would then appear in the virtual tour and on brochures created concurrently
19 with the virtual tour.

20 From the main tour editing screen display, step P4, the affiliate may
21 choose to perform quick editing of an existing virtual tour that he or she
22 already has on the site, and representative step P10 provides a Quick Edit
23

1 Tour screen display, and an internet embodiment of this invention as
2 illustrated in Figures 17, 18A and 18B. The quick edit feature allows the
3 affiliate to manipulate the most commonly changed fields in a listing and
4 also to schedule various items, such as an open house for instance, if it is
5 a real property sale virtual tour. In the event an affiliate wishes to
6 schedule an open house in that embodiment, he or she proceeds to step P11,
7 which represents a Schedule Open House screen display, as more fully
8 illustrated in Figure 19.

9
10 Figure 20 illustrates a part of the template for the entry of open
11 house data within step P11, and as shown more fully in Figures 21, 22A
12 and 22B. The resulting screen display illustrates the edit or change to the
13 Quick Edit tour screen display after step P11 is followed and an open house
14 is scheduled.

15 If the affiliate desires to proceed to Step P12, which is a tour
16 information editing screen display to create a new tour, he or she would
17 proceed to such step but would be interrupted by a pop-up window which
18 would contain the Terms and Conditions of Use for the property viewing
19 system, which is represented by step P13. The Terms and Conditions of
20 use must be accepted before the viewing system will allow the affiliate to
21 proceed to build or create a new tour. Step P13 is more fully illustrated
22 in Figure 23.
23

1 An affiliate desiring to create a new virtual tour should have the
2 requisite information or data ready for input before proceeding to create a
3 tour, and this system provides the affiliate a checklist of the requisite data
4 required for input. The checklist may be provided at multiple locations,
5 such as just after the affiliate has accepted the Terms and Conditions of
6 Use (step P13). If the checklist is provided at that point, it would be step
7 P14. An internet embodiment screen display for step P14 is illustrated in
8 Figures 24, 25A, 25B and 25C. It is at this step that the affiliate is
9 reminded of the information which needs to be input to create a virtual
10 tour, as well as the decisions that must be made once he or she proceeds
11 to step P14. This checklist may alternatively be provided at step P2 or P3,
12 as shown in Figure 8B by selecting the "click here for a list of things you
13 will need to build a new tour" button or selection.
14

15 Figure 2 further illustrates step P12 being a tour information editing
16 screen display, an internet embodiment of which is more fully shown in
17 Figures 27, 28A, 28B and 28C. This is the main tour creation and editing
18 screen for creating and editing virtual tours of property units.

19 Figure 2 further illustrates step P23, which is a main pictures and text
20 editing screen which is encountered when selecting or clicking on the
21 pictures tab to create or edit existing pictures for a virtual tour. An
22
23

1 internet embodiment of step P23 is more fully reflected in Figures 35 and
2 36A through 36E.

3 From step P23, the affiliate may choose step P22 which is the Upload
4 Photo screen display, as shown more fully in Figure 38.

5 Step P16 is a step which involves a pop-up window which appears
6 when the affiliate selects the photo name by clicking on it. The pop-up
7 window provides a list of pre-selected photograph names to choose from in
8 labeling the uploaded photograph, and is more fully illustrated in Figure 37
9 and explained below.

10 Step P17 illustrates the brochure information editing screen display
11 step which is more fully shown in Figures 42, 43A and 43B. The brochure
12 information editing screen display then provides three different brochure
13 selections or options, as is more fully shown in Figure 43A. The brochures
14 are more fully illustrated in Figures 44, 45A, 45B, 46, 47A, 47B, 48, 49A,
15 and 49B.

16
17 Once the virtual tour has been created, there is a Purchase Tour
18 screen display, represented by step P18, which is more fully reflected in
19 Figures 50, 51a and 51b. The affiliate may then proceed to step P19 to
20 print the invoice, or to step P20 to engage in an online transaction, e-
21 commerce, or to step P21 to request the server to bill the affiliate.
22
23

1 Figure 3 is a block depiction of an embodiment of a starting page or
2 Home Page screen display for an internet application of this invention,
3 which is shown more fully in Figures 4A and 4B.

4 Figure 4A illustrates a common browser page or outline with the
5 Home Page for a virtual tour site therein. From the Home Page screen
6 display illustrated in Figures 4A and 4B, there are numerous common or
7 known menu selection or options for customer and affiliates. The Home
8 Page screen display provides several buttons which may be selected or
9 clicked on by the mouse pointer to move to other memory areas or pages
10 of the website.

11 Sign-Up Now button 140 retrieves the Sign-Up Now screen display,
12 as more fully illustrated in Figures 5, 6A, 6B and 6C, and described below,
13 which allows a new potential affiliate to sign up and become authorized to
14 modify or build virtual tours. The Build a New Tour button 141 and the
15 Modify a Tour button 142 retrieve the Log-In screen display reflected and
16 more fully explained with respect to Figures 7, 8A, 8B, 9, 10A and 10B.
17 The Click Here to See a Tour button 143 retrieves a sample virtual tour of
18 a property unit, in this example a house offered for sale, which is then
19 available for the user to virtually tour or preview.
20

21 The Click Here to See a Tour button 143 or link in Figure 4A, when
22 selected or clicked on, presents a pop-up window which gives a preview or
23

1 sample virtual tour of the property unit, in this embodiment a real property
2 unit. The Tour Examples button 145 retrieves the same sample or preview
3 virtual tour as the Click Here to See a Tour button 143. The Click Here
4 to Build a Tour button 144 or link, takes the affiliate to the Terms and
5 Conditions of Use screen which is described more fully elsewhere herein.

6 Figures 4A and 4B also present self-explanatory information to
7 affiliates and potential affiliates, such as testimonials, lists of persons who
8 are using the virtual tour in their business, frequently asked questions, and
9 other self-explanatory and sales, customer service related features.

10 Figure 5 is a block depiction of a Sign-Up screen display wherein
11 new affiliates or clients input their personal information and are required to
12 review and accept the Terms and Conditions of Use in order to gain access
13 to the property viewing system, and in order to be able to create and edit
14 virtual tours of property units. Figures 6A, 6B and 6C illustrate this "Sign
15 Up Now" screen display. Once the personal information 150 is entered and
16 the prospective affiliate selects or clicks on the I Agree to These Terms
17 button 151, the affiliate is then able to proceed to build or modify virtual
18 tours.
19

20 If the affiliate chooses the Build a New Tour button 141, the Build
21 a Tour login screen display depicted in Figures 8A and 8B are retrieved.
22 The affiliate then enters his or her e-mail address in box 155 and his or her
23

1 password in box 156, thereafter clicking login button 157 to gain access to
2 the main tour editing screen.

3 If the affiliate chooses the Modify a Tour button 142 in Figure 4A,
4 he or she will be presented with a screen display reflected in Figures 10A
5 and 10B, which allow him or her to modify an existing tour. The affiliate
6 will then be required to enter his or her e-mail address in box 158,
7 password in box 159 (Figure 10A), and then select or click on the log-in
8 button 160 to gain access to the main tour editing screen. If the affiliate
9 selects or clicks on "Quick Edit" button 166, he or she will be directed to
10 step P10 and Figure 17, as described more fully below.

11
12 It will be appreciated from viewing the screen displays reflected in
13 Figures 8A and 8B and Figures 10A and 10B, that from this display the
14 affiliate can choose other selections on the left-most column to enter other
15 parts of the website or other web pages, all of which are known in the art.

16 Once the e-mail address and password are properly entered and
17 accepted, the affiliate is logged in, he or she may be presented with a
18 getting started aid as depicted in Figure 11 and illustrated in Figures 12A
19 and 12B. The e-mail and password information results in the "retrieval of
20 a list of tours" button 160 as reflected in Figure 12A. From the list of
21 tours provides certain information regarding the existing virtual tours that
22 affiliate currently has on the website, in the database or on the system.
23

1 From the column on the left of the screen display reflected in Figures
2 12A and 12B, the affiliate is presented with a tour menu 161 which
3 provides certain linking buttons to click on to allow better navigation or
4 maneuvering through the site or to particular virtual tours that the affiliate
5 already has created. Tour menu 161 provides help button 170, contact
6 information button 169, quick edit tours button 162, create a new tour
7 button 163, tour hit counters button 164, and logout button 165.

8 The left-hand column also provides a list of tours section which
9 provides the affiliate's name and a listing of tours the affiliate already has
10 in the viewing system. For example, inactive tour number 100409 in Figure
11 12A is for a real property unit with an address of 123 Yellowbrick Lane.
12 Selecting or clicking on the listing 167 will allow the affiliate to edit and
13 perform other tasks relative to that particular virtual tour.

14
15 Figures 12A and 12B also provide a right-hand column with other
16 helpful information to the affiliate, and this can be changed as desired, and
17 is generally known in the art. Selecting or clicking the Contact Information
18 button 169 allows the affiliate to change contact information and
19 photographs regarding the affiliate, his or her company, and other pertinent
20 information which appears with virtual tours and on brochures. Selecting
21 Contact Information button 169 takes the affiliate to the screen display
22
23

1 reflected in Figures 13, 14A, 14B and 14C, which will be discussed more
2 fully below.

3 If the affiliate selects the Quick Edit Tours button 162, he or she will
4 be taken to the quick edit tours screen display more fully reflected in
5 Figures 17, 18A and 18B, which will be more fully discussed below. If
6 the affiliate selects or clicks on the Create a New Tour button 163, the
7 affiliate will be returned to the main tours editing screen display, assigned
8 a tour number and provided the template boxes to input data to compose
9 a data set, and to upload photographs if desired.

10 If the affiliate selects the Tour Hit Counters button 164, the Tour Hit
11 Counters screen display will be retrieved, as shown more fully in Figures
12 15, 16A and 16B, which will be more fully discussed below. Needless to
13 say, if the affiliate selects or clicks on the logout button 165, he or she
14 will be logged out of the system.

15 Figure 13 is a block depiction of a diagram of the Contact
16 Information screen display which may be used in an internet embodiment
17 of this invention, wherein the affiliate may input or edit personal, business
18 or advertising data and photographs about the affiliate, such as shown in
19 Figures 14A, 14B and 14C.

20 The Contact Information screen display further allows the affiliate to
21 upload company logo information and photographs. For instance, in Figure
22
23

1 14C the affiliate may upload his or her company logo into logo box 180
2 by selecting or clicking the upload button 181. The affiliate may similarly
3 upload a second company logo into the logo box 182 by selecting or
4 clicking on upload button 183.

5 The affiliate may also upload his or her personal photograph into
6 contact photo box 184 by selecting or clicking upload button 185. Once
7 the affiliate has completed his or her entries into the Contact Information
8 page, the "post changes" button 186 may be selected or clicked to update
9 the database and/or memory area where the information, logos and
10 photographs are stored. Clicking on upload button 181, upload button 183
11 or upload button 185 will retrieve and upload a standard windows screen
12 display, an example of which is shown in Figure 38, and which is discussed
13 more fully below.
14

15 If the affiliate selects "tour hit counters" button 164 shown in Figure
16 12A, it will retrieve a Tour Counters screen display for that affiliate, which
17 provides a list of tours stored in the viewing system and informs the
18 affiliate of the number of hits or visits to that tour per day, as well as the
19 total number of hits, as more fully reflected in Figures 16A and 16B. The
20 hits column 190 and the hits per day column 191 are shown as of the
21 applicable start dates for each of the respective tours of the affiliate shown
22 in Figure 16A.
23

1 If the affiliate selects the Quick Edit Tours button 162 in Figure 12A,
2 the Quick Edit Tours screen display as reflected in Figures 17, 18A and
3 18B, will be retrieved. The quick edit tours screen display allows the
4 affiliate to manipulate the most commonly changed fields in a virtual tour,
5 such as the price and the active versus inactive status of the virtual tour.

6 The Quick Edit Tours screen display also provides an open house
7 column 193 to indicate information regarding an open house on the property
8 unit itself. For instance, as shown in Figure 18A, virtual tour number
9 100409 has a schedule button 194 which allows the affiliate to select or
10 click on the schedule button 194 to schedule an open house for that
11 property unit. If the affiliate selects schedule button 194, the schedule open
12 house screen display reflected in Figure 19 will be retrieved.

13
14 The Schedule Open House screen display illustrated in Figure 19
15 provides information boxes to input data regarding an open house and
16 provides information box 194 for the last date the open house (the date the
17 system clears the open house scheduled date in Figure 20), information box
18 195 for the date of an upcoming open house, information box 196 for the
19 name of the host or hostess who will be at the open house. Once the date
20 is entered in the respective information boxes, the affiliate may select the
21 "OK" button 197 to approved the entry of the data into the Quick Edit
22
23

1 Tours screen display if any new data has been entered, and to then return
2 to the Quick Edit Tours screen display.

3 Figure 20 reflects that an affiliate has entered a date of April 10,
4 1999 (item 177) into information box 195 to schedule an open house, and
5 Figures 21, 22A and 22B reflect the now scheduled open house in open
6 house column 193, of April 10, 1999 (item 177).

7 The information reflected in Figure 22A for tour number 100409, for
8 an address of 1244 Yellowbrick Lane, reflects the information for one
9 property unit, in this case a real property unit which is a house located on
10 Yellowbrick Lane. Figure 22A further reflects a status column 200 which
11 informs the affiliate of the status of the virtual tour on the viewing system,
12 such as whether the subscription has been paid, and if so the date through
13 which it has been paid, or whether it is expired.

14 From the main tours editing screen display, if the affiliate selects the
15 "create a new tour" button 163, the Terms and Conditions of Use screen
16 display reflected in Figure 23 will be retrieved. Before the affiliate will be
17 allowed to create a new virtual tour, the terms and conditions of use must
18 be accepted by selecting "accept" button 201. The affiliate may choose not
19 to proceed to create a virtual tour or choose not to agree to the terms and
20 conditions of use by selecting or clicking on "cancel" button 202.
21
22
23

1 Figures 24, 25A, 25B and 25C reflect a checklist for tours screen
2 display which informs the affiliate of the information and data that will be
3 required in order to create or build a new virtual tour. The checklist for
4 tours screen display may be retrieved after the affiliate has accepted the
5 terms and conditions of use by selecting the accept button.

6 After the affiliate has accepted the terms and conditions of use, a
7 pop-up window is presented for creating a new tour and requires that the
8 affiliate enter or select certain basic information about the tour to be built
9 or created. Figure 26 reflects the creating a new tour screen display, which
10 is step P14 in Figure 2.

11 In Figure 26, the affiliate selects the type of tour, whether it be
12 residential, commercial or other, by selecting the name from the drop-down
13 menu 210. The affiliate also selects the number of photos to be presented
14 as part of the virtual tour through drop-down menu 211, and indicates
15 whether the photographs will be supplied by uploading them or by mailing
16 them. By selecting the appropriate upload or mail indicator, the affiliate
17 identifies the method for building the virtual tour with photographs. Once
18 the creating a new tour information has been input or selected, the affiliate
19 may select the "OK" button 212 to proceed to the tour information editing
20 screen, shown more fully in Figures 27, 28A, 28B, and 28C.
21
22
23

1 In the preferred embodiment of this invention the tour data or text
2 information is stored in a database or a memory area, and the photographs
3 are stored in a memory area.

4 The tour information editing screen display is reflected in Figures 27,
5 28A, 28B and 28C. It is from this tour information editing screen display
6 that most of the editing and creation of a virtual tour are accomplished, and
7 Figures 28A through 28C reflect a sample template for a data set to be
8 entered into, relating to a particular property unit. A data set may be a
9 variety of information chosen for the specific embodiment or application of
10 the embodiment, all within the contemplation of this invention.

11 In Figures 28A through 28C, tour information tab 220 has been
12 selected and provides the template for a basic data set about the property
13 unit, which in this case is a real property unit for sale. It will be
14 appreciated by those in the industry that there are numerous different items
15 which may be added or removed from the data set about the property, all
16 within the contemplation of this invention, with the preferred information
17 being shown in Figures 28A through 28C. The template may allow
18 information to be input in certain of the information boxes, while in others
19 allow it to be selected from a pre-selected list in a pull-down menu format.

20 In Figures 28A through 28C, it reflects the tour information in a field
21 column and in a data column, the field and data being related to a database
22
23

1 where the information is stored. The various fields shown in Figure 28A
2 relate to tour identification number and the tour identification information
3 box 230. The affiliate or agent identification number is input into
4 information box 231 and the price field has information box 232 receives
5 price data.

6 The property type may be selected from pull-down menu 233 which
7 is shown pulled down in Figures 30A and 30B, giving a plurality of
8 property types to select from to input the data into the template. Examples
9 of property types which may be selected are residential, commercial, travel,
10 rent, education, golf, entertainment, automobile, senior, industrial or
11 dealership. It will be appreciated that this list is no way by limitation, as
12 there are many other property types that may be used for real property and
13 for other types of property, all within the contemplation of the viewing
14 system provided by this invention.

15
16 Figure 28A further shows a field entitled "property sub-type" wherein
17 data may likewise be selected to input a data set about the property unit
18 reflected as tour number 102461. Figures 32A and 32B reflect a possible
19 pull-down menu to be used for the property sub-type data field box 234 and
20 lists such selections as residential, residential with acreage, lots and land,
21 waterfront, and others.
22
23

1 Figure 28A further illustrates a tour title information box 235 where
2 the affiliate may enter a title of the virtual tour being created. Information
3 box 236 in Figure 28B allows the affiliate to input address information
4 about the property unit and information boxes 237, 238 and 239 allow the
5 input of the zip code, city, state and region (box 240) of the particular
6 property unit in question. In the preferred embodiment, the affiliate inputs
7 the zip code and the city, state and region are automatically inputted by the
8 system, thereby removable the need for the affiliate to enter the data
9 manually. Information box information box 241 (Figure 28B) allows the
10 input of information regarding the area of town in which the property unit
11 is located.

12
13 Information in the number of bedrooms field may be selected by
14 clicking on the pull-down menu 242 and then selecting the applicable
15 number of bedrooms. In similar manner, data may be input into the
16 number of baths field by clicking on the pull-down menu 243 and then
17 selecting the appropriate number.

18 Figure 28B further illustrates other fields which may be used and
19 corresponding information boxes or pull-down menus to build the virtual
20 tour and receive the data to comprise a data set about the property unit.
21 Fields such as multiple listing service ("MLS") number, style of the property
22
23

unit, year the property unit was built, mortgage calculator link and list date are also shown in Figure 28B.

Figure 28C shows additional database fields into which data can be entered into the template, including a map link which provides a map of the area and a location of the property unit on the map, a school link which provides information about the applicable schools for the property unit, and a database field for the selection of web sites used to showcase the virtual tour. "Post changes" button 244 may be selected or clicked on to then enter the changes, additions or edits made to the template as reflected in Figures 28A, 28B and 28C. The virtual tour template creates a framework for the entry of data and photographs.

Figure 29 is a block depiction of a diagram of the main tour information editing screen display showing the pull-down menu for the selection of property type information and is more fully shown in Figures 30A, 30B and 30C. Figures 30A and 30B are intended to show the pull-down menu selections which are used for entry to comprise the data set for the property unit in question.

Figure 31 is a block depiction of a diagram of the main tour information editing screen display showing the pull-down menu and selections available for the property sub-type database field, as reflected more fully in Figures 32A, 32B and 32C. Other information has been input

1 into the various information boxes, which will then comprise a data set for
2 the property unit.

3 Figure 33 is a block depiction of a diagram more fully shown in
4 Figures 34A, 34B and 34C, of the main tour information editing screen
5 showing the drop-down menu selections for the style database field, showing
6 pull-down menu 246 and selections for ranch, bungalow, cape cod,
7 contemporary and colonial in the pull-down menu. If the affiliate selects
8 or clicks on the pictures tab 250 in Figure 28A, the screen display reflected
9 in Figures 35 and 36A through 36E will be retrieved to allow the affiliate
10 to name and upload photographs which will comprise the virtual tour.

11
12 Figure 35 is a block depiction of a diagram of the screen display one
13 encounters in an internet embodiment of this invention when selecting or
14 clicking on the "pictures" tab 250, as shown in Figure 28A (and other
15 figures), and as more fully shown in Figures 36A, 36B, 36C, 36D and 36E.

16 Figure 37 is a pop-up window which appears when the affiliate
17 selects the photo name by selecting it or clicking on it. The pop-up
18 window provides a list of pre-selected photograph names to choose from in
19 labeling the uploaded photograph. This selection may be used to edit or
20 change an existing photograph name.

21 Figure 36A allows the affiliate to select the number of photographs
22 to be included in the virtual tour by making a selection from pull-down
23

1 menu 180. Figure 36A further illustrates the first photo and accompanying
2 data for the first photo which comprises part of the data set for this
3 property unit. Photo tab label 181 indicates a front view of the house as
4 what is shown, and that is what is also reflected in photograph 182.

5 If the affiliate desires to change the photo name, he or she can select
6 or click on the photo label tab and a pop-up window will be retrieved
7 which provides a listing of preselected photo names for potential inclusion
8 in photo label tab 181. The pop-up window is shown more fully in Figure
9 37 and discussed below. During the initial creation of a virtual tour, the
10 first photo label tab 181 would be labeled "first photo" and the affiliate
11 would need to choose which photo to use as the first photograph and the
12 corresponding photo name to place within tab 181.

13
14 Figure 36B illustrates more of the photograph and text editing screen
15 display and includes photograph 185 of a kitchen area and photo name 186
16 indicates it as a kitchen area. The affiliate would next add text or data to
17 the data input box 187 to provide information relating to the image of the
18 kitchen area. If the affiliate desires to change or alter photograph 185,
19 selecting or clicking on upload photo button 211 would bring an upload of
20 photo pop-up window to the screen to allow a new photograph to be
21 designated for this location.
22
23

1 A sample upload of photograph pop-up window is illustrated in Figure
2 38 and described more fully below. The remainder of the screen display
3 illustrated on Figures 36A through 36E are similar to that indicated for
4 photo number 2 for the kitchen area. In Figure 36E, room number eight
5 (8) is indicated as the photo name and remains to be completed by the
6 affiliate. If the affiliate chooses to only use seven photographs, he or she
7 would then go up to pull-down menu 180 and change the number of
8 photographs. Any additional views and accompanying data text may be
9 input for the property unit to complete the designated areas for photograph
10 and accompanying data text for room number 8 and for room number 9.

11 Figure 37 is an embodiment of an exemplary pop-up window 189
12 which can provide pre-selected names to place on the photograph label tabs,
13 such as photograph label tag 181 shown in Figure 36A. In order to select
14 a pre-selected photograph label to place in a photograph label tab, the
15 affiliate would simply select or click on the photograph label tab 181, which
16 would bring up the pop-up window 189 screen display with the pre-selected
17 labels contained thereon. By selecting or clicking on a particular pre-
18 selected label or name, this causes that label or name to be placed within
19 the tab which had previously been selected by the affiliate and which
20 caused the pop-up window 189 to appear.
21
22
23

1 Figure 38 is an "upload a photograph" pop-up window 188 which
2 would become displayed when an affiliate would select or click on an
3 upload photo button, such as upload photo button 190 shown in Figure 36A.
4 Selecting the upload photo button 190 would cause the pop-up window 188
5 shown in Figure 38 to appear, and this then allows the affiliate to input the
6 file location of the photograph in file information box 192. The affiliate
7 may select or click on browse button 193 to browse various memory areas
8 to select the appropriate photograph file from those areas.

9 The pop-up window 188 also allows the affiliate to identify the nature
10 of the photo, i.e., whether it is a standard photograph, a panoramic or extra-
11 wide photograph, 360 degree panoramic photograph, or a 360 degree IPIX
12 photograph. IPIX is a type of photograph by IPIX Corporation. Once the
13 photograph file has been identified and the photo type selected, the affiliate
14 would select the "OK" button 194 to cause the photograph to be uploaded
15 into the designated location on the screen display, such as photograph
16 window 182 in Figure 36A. This viewing system gives the affiliate the
17 option to input multiple types of photographs into the same virtual tour
18 template, namely a still photograph, an over-sized photograph, a movable
19 photograph, a 360 degree panoramic photograph, a panoramic photograph
20 less than 360 degrees, as can be seen from the accompanying drawings.
21
22
23

1 An alternative or complementary embodiment allows the affiliate to
2 email the photograph to the web server computer 110 instead of directly
3 uploading it from the affiliate computer, which is more fully explained
4 below in connection with Figures 62, 63, 64 and 65. In the alternative
5 embodiment illustrated in Figures 62, 63, 64 and 65, the process of e-
6 mailing the photograph to the web server 118 where the virtual tour is
7 located is considered herein to be uploading that photograph.

8 If the affiliate selects or clicks on any particular photograph which
9 has already be uploaded into the viewing system, as shown in Figures 36A
10 through 36E, it will cause a pop-up window 201 to be displayed in Figure
11 39. The pop-up window is to allow the affiliate to adjust or tune the
12 photograph selected. The affiliate may choose to edit the JPEG file quality
13 by changing the number in the JPEG quality information box 202 and/or
14 may change the brightness in the photograph by inputting into brightness
15 information box 203 a different brightness setting. Once the subject
16 photograph has been sufficiently tuned or edited, the affiliate may select the
17 "accept new photo" button 204 to incorporate the edited photograph back
18 into the screen display of the pictures in the virtual tour as more fully
19 reflected in Figures 36A through 36E.
20

21 Figure 40 is a block depiction of the main tour information editing
22 screen display, with the number of photos pull-down menu selected and
23

being utilized to select the number of photographs to be included in the virtual tour of the subject property unit. Figures 41A and 41B more fully illustrate the screen display with the pull-down window 180 in the pulled down position. Another advantage and feature of this property viewing system and this invention is the creation of brochures or flyers using part or all of the data set and photographs inputted for the virtual tour by selecting the brochure info tab 251 on the screen display shown in Figure 28A.

Figures 43A and 43B show the screen display depicted in the block diagram in Figure 42. Figure 43A illustrates a first brochure template 300, a second brochure template 301, and a third brochure template 302, each having a different format and each incorporating part or all of the data set inputted for the tour for the subject property unit and each incorporating one or more photographs from the pictures uploaded for the virtual tour. The affiliate is able to select the brochure type or types desired for promotion of the property unit.

Figure 45A illustrates brochure template 300 (shown in Figure 43A) in larger display form, illustrating a sample format for a property unit brochure. For the subject property, the photograph 302 in Figure 45A was taken from photograph 182 in Figure 36A where the photograph was uploaded. Photograph 303 from brochure template 300 is photograph 185

1 from Figure 36B and which was input for the virtual tour and additionally
2 incorporated into brochure template 300. It will be appreciated by those
3 skilled in the art that the affiliate may also be given the option to upload
4 or e-mail a different or a non-tour photograph for inclusion within in the
5 brochure.

6 The remaining data 305 illustrated in Figures 45A and 45B is taken
7 from the property data set input to create the virtual tour of the property
8 unit. Brochure template 300 may be printed and used by the affiliate in the
9 promotion of the property unit or the promotion of a time unit of the
10 property unit, or the web page which brochure template 300 represents may
11 be e-mailed to potential business associates or customers of the affiliate in
12 order to further promote the property unit.

13 Figure 46 is a block depiction of the screen display represented by
14 Figures 47A and 47B and is a second brochure template 310 of the subject
15 property unit, illustrating photograph 311, photograph 312, and photograph
16 313, all of which are photographs utilized in the virtual tour and uploaded
17 in the creation of the virtual tour. The data 314 shown on brochure
18 template 310 was taken from the data set for the property unit in question.

19 Figure 48 is a block depiction of the brochure screen display
20 illustrated in Figures 49A and 49B of a property brochure template 320.
21 This is a third option for a property brochure which includes photograph
22
23

321 and data 322. The photograph 321 and the data 322 were taken from the photographs entered for the virtual tour for the subject property, and the data was taken from the data set for the property unit.

Figure 50 is a block depiction of a diagram of the purchase screen display wherein the affiliate initiates the purchase of the virtual tour, selects advertising and methods of providing text, which is self explanatory from the review of Figures 51A and 51B. The affiliate may select "printable invoice" button 333 and will be provided an invoice for the purchase of the virtual tour and listing. The tour invoice is more fully shown in Figure 52 and Figures 53A, 53B and 53C. The tour invoice may be printed by the affiliate and provides basic information regarding the tour, what was purchased, billing information, property description and any other information desired.

Figure 53C provides a credit card information section to accomplish an electronic commerce transaction, wherein the affiliate can fill in credit card information to pay for the virtual tour, all of which is well known in the trade and will therefore not be discussed in any further detail.

Figure 54 figuratively illustrates one way to visualize or provide a movable photograph as part of a virtual tour. The preferred movable photograph 370 is made to move by a java applet which provides the photograph 370 in the desired browser window 371, and then provides a

1 way to appear to make it move. The preferred size of the browser window
2 371 is 270 pixels by 450 pixels, whereas the size of the photograph 370 is
3 larger than the browser window 371 size.

4 When the photograph is uploaded or e-mailed and then uploaded
5 (depending on the alternative chosen), the affiliate is asked to identify the
6 type of photograph, as is more fully explained in relation to Figure 38
7 above.

8 While this is the preferred way, i.e. using a java applet, it will be
9 appreciated by those skilled in the art that there are other known ways to
10 accomplish this, such as without limitation, through the use of a floating
11 frame reference, or the use of a program plugin.

12 Since movable photographs or the appearance of a movable
13 photograph is known, it will not be discussed in significant detail.
14 Furthermore, the java applet source code is set forth in the microfiche
15 appendix being filed herewith. The microfiche contains seventy nine pages
16 of computer source code comprising one embodiment of the computer
17 readable instructions which may be used to practice an embodiment of this
18 invention, and which are hereby incorporated into this specification by this
19 reference.
20

21 Figure 55 is an elevation view of a panoramic photograph 400 of the
22 front of a property unit 402 for which a virtual tour is desired. The
23

1 photograph 400, as digitized, is larger than the size of the viewer window
2 401 in the browser. This invention provides for a movable photograph 400
3 and the java applet routines causes the underlying image to move relative
4 to the viewer window 401, thereby appearing to the viewer that he or she
5 is movable his or her head to view the property.

6 Figure 55 also figuratively show splice or stitch lines 404 where more
7 than one actual photograph was digitized and the multiple photographs were
8 stitched or spliced together. It will be appreciated in the art that there are
9 numerous known ways to achieve a panoramic photograph, including by
10 stitching or splicing, using a panoramic camera which produces these in a
11 single photograph, or by using other types of cameras and film which are
12 well known in the industry.

13
14 There are numerous well known computer software programs which
15 perform the stitching or splicing of photographs together, including
16 PhotoVista by Live Picture, as one example.

17 When it comes to panoramas, the size of the digital file is very
18 important and too large of a photograph may take too long to load. This
19 may cause potential clients or buyers to become irritated and possibly move
20 on to other property or other search sites. On the other hand, some clients
21 and potential clients look for property units that have a panorama because
22 it gives them a better understanding for what they're seeing.
23

1 The size of the photograph should be at least 270 pixels in height to
2 fill the viewer window, and if it is taller than this, the viewer or client may
3 scroll the entire photograph using the movable photograph feature of this
4 invention.

5 When taking a panoramic photograph in a series of photographic
6 views, the affiliate preferably should leave approximately twenty percent
7 (20%) overlap from one photograph to the next so that the photographs may
8 be spliced or stitched together. It is important that the camera be kept
9 level of all times when taking panoramic photographs for splicing together.
10 If possible, a tripod should be used. If the internet browser utilized by the
11 viewer is java compatible, the panoramic photographs will automatically
12 launch into motion and can be navigated by the mouse of the user, upon
13 the proper identification upon uploading the photograph, as described above.
14

15 As bandwidth is increased over the internet or other networks, it will
16 allow larger photographs and video taping of properties, all within the
17 contemplation of this invention.

18 In the preferred embodiment, if a movable picture is being viewed,
19 the client may move the mouse arrow in the viewer window to cause the
20 photograph to move relative to the viewer window, and in the direction of
21 the side of the photograph where the mouse pointer is moved.
22
23

1 This is figuratively illustrated in Figure 56. Panoramic photograph
2 410 is broken into sections, and when the mouse pointer is placed in
3 section 411 the photograph 410 appears to move to the right so that more
4 of the left side of the photograph 410 may be viewed, analogous to the
5 viewer turning their head to the left. The further to the left the mouse
6 pointer is moved, the faster the photograph 410 appears to move the right.
7 When the mouse pointer is moved into section 412 it causes the photograph
8 410 to appear to move downwardly to appear that the viewer is looking up
9 or seeing more of the top of the photograph 410. The higher up in
10 section 412 the mouse pointer is moved, the faster the photograph 410
11 appears to move downward.
12

13 The photograph will actually start to move when the mouse pointer
14 is within the middle section of the photograph 410, but off from center in
15 the horizontal direction.

16 Similarly, when the mouse pointer is placed in section 413, the
17 photograph moves to the left, and when the mouse pointer is moved into
18 section 414, the photograph appears to move upward so the viewer may see
19 more of the bottom of the photograph.
20

21 Figures 57 through 60 are a partial example of a virtual tour of a
22 property unit. Figure 57 illustrates the virtual tour page 500, with the large
23 viewing window 501 for viewing the various view displayed, depending on

1 which tab above is selected. In the example shown, eleven tabs are
2 illustrated: master tab 503; master bath tab 504; neighborhood tab 505;
3 brochure 506; map tab 507; front tab 508; kitchen tab 509; dining tab
4 510; second dining tab 511; golf course tab 512; and family tab 513.
5 Each tab represents a link to another photograph or view of the property
6 unit with accompanying data.

7 In the view shown, photograph 502 is the front view shown. In
8 order to go directly from any view or photograph in the virtual tour to any
9 other photograph or image, the viewer need only select or click on the
10 desired tab. For example, if the viewer wants to view the kitchen
11 photograph 520 and accompanying text, he or she would simply click on the
12 kitchen tab 509, and the view shown in Figure 58 would appear.

13
14 Similarly, if the viewer wanted to look at a view of the dining room
15 photograph 521, he or she would click on the dining tab 511, and the
16 screen display shown in Figure 59 would appear. Note that the dining
17 photograph 521 is a larger than standard photograph and is a panorama
18 photograph (or movable photograph), as that term is used herein. The
19 asterisk next to the name on the tabs indicates that the photograph is a
20 movable photograph or panorama photograph versus merely a still
21 photograph. In Figure 57, the master tab 503 links to a movable
22 photograph, as indicated by the asterisk.
23

1 If the viewer of Figure 59 desired to see the master bathroom, he or
2 she would click on the master bathroom tab 504 and the bathroom
3 photograph 522 shown in Figure 60 would be displayed.

4 The utilization of such a tab system allows all of the photographs
5 from the same property unit to be viewed with ease, enabling the viewer
6 to move directly from one photograph to any other makes the virtual tour
7 much more pleasing to view.

8 It will be appreciated by those in the property management, travel and
9 vacation rental industries, that there are other embodiments of the present
10 invention which may be utilized in those industries. For example, one
11 embodiment or application of this invention is in the rental or vacation
12 industry. In that embodiment, a rental agency has certain occupation time
13 units available for its rental property, and has a need to provide virtual
14 tours accessible over the internet to potential and existing customers.
15

16 In order to avoid in the cost of photographing, uploading and
17 providing a virtual tour on a website or web server, the property manager
18 may exchange one or more of the time units in his or her property unit, in
19 consideration for the construction of a virtual tour of the property, and/or
20 for maintaining the virtual tour onsite available for viewing by persons
21 having access to the public communications network.
22
23

1 Figure 61 illustrates in block diagram form an example of one
2 possible embodiment of the invention wherein one or more available time
3 units 600 for a property unit 599 are exchanged in consideration for
4 creating and/or maintaining or posting a virtual tour 601 posting of the
5 property unit on a webserver 602 available over a public communications
6 network such as the internet 603. Client computers 604 and affiliate
7 computers 598 may then be connected to virtual tour of properties via the
8 public communications network, to tour the property unit.

9 Figure 62 is a pop-up window screen display of an Insert Photo
10 which is prompted by selecting or clicking on the Upload Photo buttons
11 described herein, giving the affiliate the option to either directly upload the
12 photograph or to email it as an attachment to the virtual tour web site, as
13 part of step P9.

14 The term "upload a photo" as used herein is intended to cover,
15 without limitation, both the uploading of the photograph and the e-mailing
16 of the photograph, as set forth herein.

17 In Figure 62, the affiliate is presented with pop-up window 850 in
18 order to insert a photograph into a window of a virtual tour of a property
19 unit, the pop-up window 850 giving the affiliate two options, namely to
20 directly upload 854 or to email a photo 853. If the affiliate directly
21
22
23

1 uploads the photograph, he or she selects the "upload a photo now" button
2 852 and follows the procedure outlined above with respect to step P9.

3 If the affiliate has chosen to email the photograph, it would be
4 received by the web server 118 (shown in Figure 1) and when the affiliate
5 then chooses the "pick an e-mailed photo" button shown in the screen
6 display in Figure 62, the affiliate will be presented with pop-up window 860
7 illustrated in Figure 63. The system keys on the address from which the
8 photograph was e-mailed (as it may come from one or more sources), and
9 provides the affiliate a list or viewing of those photographs which came
10 from that e-mail address.
11

12 Figure 63 further reflects viewing box 863 in which a list of source
13 email addresses are listed, which in the example shown, is only one source
14 address 863, namely "herb@tours.net." The affiliate may then select the
15 "view photos" button 864 to review thumbnail photographic depictions of
16 those photographs which have been e-mailed to the web server from the
17 selected email address.

18 If the affiliate selects the "view photos" button 864, he or she is
19 provided with thumbnails such as thumbnail photograph 871 and thumbnail
20 photograph 873 shown in Figure 64, which are identified by their file name
21 100316B.jpg (item 872) and file name 100316D.jpg (item 874). The
22 photograph naming convention utilized is the combination of the six digit
23

1 tour identification number combined with a letter, "A" representing the first
2 photograph in the tour, "B" representing the second photograph in the tour,
3 and so on.

4 Once the affiliate selects one of the e-mailed photographs, the pop-up
5 window 880 reflected in Figure 65 will be displayed, showing the selected
6 photograph 881, along with its name, and selection options for the affiliate
7 to identify whether the photograph is a standard photograph 882, a
8 panoramic (extra-wide) photograph 883 or a 360 degree panoramic
9 photograph 884. Once the proper photograph is displayed and the type of
10 photograph identified, the affiliate selects the OK button 885 and the
11 photograph is copied from the web server to the one or more memory areas
12 where the tour photographs are stored.
13

14
15 In compliance with the statute, the invention has been described in
16 language more or less specific as to structural and methodical features. It
17 is to be understood, however, that the invention is not limited to the
18 specific features shown and described, since the means herein disclosed
19 comprise preferred forms of putting the invention into effect. The invention
20 is, therefore, claimed in any of its forms or modifications within the proper
21 scope of the appended claims appropriately interpreted in accordance with
22 the doctrine of equivalents.
23

1 CLAIMS:

2 We claim:

3 1. A method in a computer system for providing an electronic template
4 for inputting and providing a virtual tour of one or more real property units
5 over a public communications network, comprising the following steps:

6 a. making available to one or more affiliates via the public
7 communications network, a virtual tour template on one or more
8 memory areas, said virtual tour template providing a framework for
9 affiliates to input photographs and a data set to create a virtual tour
10 of a real property unit;

11 b. receiving from the affiliate via the public communications
12 network, at least one movable photograph of part or all of the real
13 property unit, and storing the at least one movable photograph in one
14 or more memory areas such that it is available to be dynamically
15 retrieved by the virtual tour template and thereby included as part of
16 the virtual tour;

17 c. receiving from the affiliate via the public communications
18 network, the data set corresponding to the movable photograph, and
19 storing the data set in the one or more memory areas such that it is
20 available to be dynamically retrieved by the virtual tour template and
21 thereby included as part of the virtual tour; and
22
23

1
2 d. making available to one or more clients via the public
3 communications network, the virtual tour dynamically utilizing the at
4 least one movable photograph and the data set in the virtual tour
5 template.
6

7 2. A method in a computer system for providing an electronic template
8 as recited in claim 1, and further the virtual tour is made available via the
9 public communications network, as a link from a website of the affiliate.
10

11 3. A method in a computer system for providing an electronic template
12 as recited in claim 2, and further comprising the steps of returning the
13 client viewing the virtual tour to the website of the affiliate upon conclusion
14 of the virtual tour.
15

16
17 4. A method in a computer system as recited in claim 1, and further
18 comprising the following steps:

19 a. receiving from the one or more affiliates via the public
20 communications network at least one still photograph of the real
21 property unit, and storing the at least one still photograph in the one
22
23

1 or more memory areas such that the still photograph is available to
2 be included in the virtual tour; and

3 b. making available to one or more clients via the public
4 communications network, the virtual tour which also dynamically
5 includes the at least one still photograph in the virtual tour template
6 as part of the virtual tour.

7
8 5. A method in a computer system as recited in claim 4, and further
9 comprising the steps of providing a brochure template of the real property
10 unit on the one or more memory areas, the brochure template utilizing the
11 at least one still photograph and data from the first data set, to create an
12 electronic real property unit brochure.

13
14
15 6. A method in a computer system for providing an electronic template
16 for inputting and providing a virtual tour of one or more real property units
17 over a public communications network, comprising the following steps:

18 a. making available to one or more affiliates via the public
19 communications network, a virtual tour template on one or more
20 memory areas, said virtual tour template providing a framework for
21 affiliates to input photographs and a data set to create a virtual tour
22 of a real property unit;
23

1 b. said virtual tour template giving the one or more affiliates the
2 option to input a movable photograph having a three hundred sixty
3 degree range and a movable photograph having less than a three
4 hundred sixty degree range;

5 c. receiving from the affiliate via the public communications
6 network, at least one movable photograph of part or all of the real
7 property unit, and storing the at least one movable photograph in one
8 or more memory areas such that it is available to be dynamically
9 retrieved by the virtual tour template and thereby included as part of
10 the virtual tour;

11 d. receiving from the affiliate via the public communications
12 network, the data set corresponding to the movable photograph, and
13 storing the data set in the one or more memory areas such that it is
14 available to be dynamically retrieved by the virtual tour template and
15 thereby included as part of the virtual tour; and
16

17 e. making available to one or more clients via the public
18 communications network, the virtual tour dynamically utilizing the at
19 least one movable photograph and the data set in the virtual tour
20 template.
21
22
23

1 7. A method in a computer system for providing an electronic template
2 for inputting and providing a virtual tour of one or more real property units
3 over a public communications network, as recited in claim 6, and wherein
4 the virtual tour template additionally gives the affiliate the option of
5 inputting a still photograph.

6
7 8. A computer-readable medium containing instructions for controlling a
8 computer system, for providing an electronic template for inputting and
9 providing a virtual tour of one or more real property units over a public
10 communications network, comprising the following steps:

11 a. making available to one or more affiliates via the public
12 communications network, a virtual tour template on one or more
13 memory areas, said virtual tour template providing a framework for
14 affiliates to input photographs and a data set to create a virtual tour
15 of a real property unit;

16
17 b. receiving from the affiliate via the public communications
18 network, at least one movable photograph of part or all of the real
19 property unit, and storing the at least one movable photograph in one
20 or more memory areas such that it is available to be dynamically
21 retrieved by the virtual tour template and thereby included as part of
22 the virtual tour;
23

1 c. receiving from the affiliate via the public communications
2 network, the data set corresponding to the movable photograph, and
3 storing the data set in the one or more memory areas such that it is
4 available to be dynamically retrieved by the virtual tour template and
5 thereby included as part of the virtual tour; and

6 d. making available to one or more clients via the public
7 communications network, the virtual tour dynamically utilizing the at
8 least one movable photograph and the data set in the virtual tour
9 template.
10

11 9. A method in a computer system for displaying an affiliate input
12 system to enable an affiliate to input via a public communications network,
13 at least one movable photograph and at least one data set pertaining to the
14 at least one movable photograph, into a real property unit virtual tour
15 template, to create or edit a dynamic virtual tour of the real property unit,
16 comprising the following steps:
17

- 18 a. providing a set of computer readable instructions providing the
19 dynamic virtual tour of the real property unit, which includes
20 the affiliate input system;
21 b. displaying a login screen for the entry of data to enable the
22 affiliate to access the affiliate input system;
23

- 1 c. displaying a data set input template which allows the affiliate
2 to enter a data set pertaining to the real property unit such
3 that the data set is made available for use in the dynamic
4 virtual tour;
- 5 d. displaying a photograph input template which allows the
6 affiliate to upload at least one movable photograph, such that
7 the photographs are available for use in the dynamic virtual
8 tour; and
- 9 e. making available for display to a client via the public
10 communications network, a display of the virtual tour which
11 includes part or all of the data set and includes the at least
12 one movable photograph.

13
14
15 10. A method in a computer system as recited in claim 9, and only
16 wherein the displaying of the data input template and the displaying of the
17 photograph input window are contained on the same screen display.

18
19 11. An apparatus which provides virtual touring of real property units
20 accessible to clients over a public communications network, comprising:

- 21 a. a web server computer which is accessible by client computers
22 via the public communications network, the web server having
23

1 one or more memory areas configured to store a virtual tour of
2 one or more real property units, the virtual tour including at
3 least one movable photograph with an accompanying data set;
4 b. wherein the web server computer is accessible by affiliate
5 computers via the public communications network

6
7
8 12. A method in a computer system for providing and exchanging virtual
9 tours of one or more real property units which have occupation time units
10 available, for the creation and/or maintenance of the virtual tour, comprising
11 the following steps:

12 a. providing a computer readable medium which includes a virtual
13 tour template of a real property unit on one or more memory areas
14 which are accessible via a public communications network, the real
15 property unit having occupation time units available;
16

17 b. storing on the computer readable medium one or more
18 photographs and a data set corresponding to the one or more
19 photographs such that the one or more photographs and the data set
20 may be dynamically retrieved by the virtual tour template and thereby
21 included as part of the virtual tour, in response to a client request
22 over the public communications network; and
23

c. making said virtual tour of the real property unit accessible via the public communications network, in exchange for one or more of the occupation time units.

ABSTRACT OF THE DISCLOSURE

Disclosed is an electronic real property viewing system for providing virtual tours of real property units via a public communications network such as the internet.. The electronic property viewing system includes a system for affiliates to create their own virtual tours in real time by uploading photographs into a template, resulting in both movable and still photographs with accompanying data sets. Another embodiment of this invention involves the exchange of the creation and/or maintenance of such virtual tour available on a public communications network for occupation time units in the real property units.

If you already have a web site we make your GrandTours look like they are part of your own site, giving it tremendous value as if you built it yourself. One of the incredible benefits is: If the consumer looks at a GrandTour from your page and they hit "back to list" it will go back to your page keeping them on your web site.

Your GrandTours will get incredible exposure. They can be on your web page, your company's web page, The Yahoo Real Estate Classifieds, Home Debut's web site, and the Home Scout-iOwn.com web site. Another added benefit: There is a link to your home page from every GrandTour no matter how the tour is found.

1625 W. 4th

Offered at: \$189,000

<table border=0 cellpadding=0 cellspacing=0><tr>

<td></td>

<td width=320>

Located on the 5th green at Liberty Lake golf course, this one owner, John Builder custom home offers unsurpassed elegance and quality. Large picturesque windows provide you with 180 degree views of the golf course and the surrounding mountains of Liberty Lake. An open floor plan provides for an adjoining kitchen and family room area with a large private exterior deck. Formal dining and living rooms, an open staircase and a basement bedroom suite accent this offering.

CONDITIONS OF USE

IN ORDER TO KEEP OUR WEBSITE IN "TOP-NOTCH" CONDITION, WE HAVE A VERY HIGH LEVEL OF EXPECTATION FOR THE QUALITY OF INFORMATION THAT YOU POST HERE. WE RESERVE THE RIGHT TO MODIFY, EDIT OR DECLINE TO ACTIVATE TOURS THAT CONTAIN ANY OF THE FOLLOWING:

- VULGAR OR QUESTIONABLE LANGUAGE
- ANY THING THAT MAY BE ILLEGAL ACCORDING TO STATE OR FEDERAL LAWS
- IMPROPER GRAMMAR OR SPELLING IN THE TEXT (PLEASE RUN ALL OF YOUR TEXT THROUGH SOME SPELL CHECK SOFTWARE)
- VERY POOR PICTURE QUALITY (LIGHTING, RESOLUTION, ECT.)
- POORLY PLANNED PHOTOS (GARBAGE CANS IN FRONT OF THE HOUSE, DIRTY DISHES IN SINK, PEOPLE IN THE PHOTO ETC.)

THAT MAY SEEM A LITTLE HARSH, BUT INFORMATION THAT IS PRESENTED WELL, SELLS A HOME. IF YOU ARE HAVING TROUBLE, OR THINK ANY ELEMENT OF YOUR TOUR MAY BE CONSIDERED QUESTIONABLE, JUST GIVE US A CALL, OR DROP US AN EMAIL AT SALES@TOURS.NET.

I AGREE TO THESE TERMS — 151

27/72

I NEED HELPWHY TOURS...TOUR FAQVIEWING DIFFICULTIESCONTACT USCOMMENTS/SUGGESTIONSABOUT TOURS.NET

TOUR BY NUMBER

TYPE YOUR TOUR#:

○ HAVE OR TAKE THE PICTURES OF THE PROPERTY OR HIRE A PHOTOGRAPHER TO DO THIS. PICTURES HAVE JPEG'S. IF YOU WANT PANORAMIC JPEG PHOTOS IN YOUR TOUR USE A PANORAMIC CAMERA OR MAKE SURE YOUR PHOTOS OVER LAP SO THEY CAN BE STITCHED TOGETHER TO MAKE A PANORAMIC PHOTO. SEE OUR PANORAMIC PAGE FOR HELP AND FAQ'S.

○ KNOW HOW MANY JPEG PICTURES YOU WILL WANT FOR YOUR TOUR (1 TO 16). OUR MARKET RESEARCH SHOWS THAT 9 PHOTOS IS THE BEST ALL AROUND NUMBER FOR DISPLAYING YOUR HOME OR PROPERTY. THE STILL JPEG PHOTOS SIZE SHOULD BE APPROXIMATELY 300 TALL X 400 WIDE IN PIXELS, WHICH IS ABOUT 4" X 6".

JE II 2518

28/72

○ HAVE ALL THE PICTURES IN FRONT OF YOU WHILE WRITING THE TEXT IF POSSIBLE AND WRITE THE TEXT IN A WORD PROGRAM SO YOU CAN COPY AND PASTE IT IN THE TOUR WHEN YOU GO ON-LINE TO BUILD IT. BE PREPARED TO PROVIDE A BRIEF DESCRIPTION OF WHAT IS IN EACH PHOTO OR WHAT YOU WANT TO SAY NEXT TO EACH PHOTO. (ONE PARAGRAPH OF THREE TO FOUR SENTENCE) NO TEXT IS NEEDED FOR THE 1ST AND LAST PHOTO, THIS IS WHERE YOUR CONTRACT INFORMATION GOES. YOU WILL ALSO NEED TO SPELL CHECK YOUR TEXT IN A SOFTWARE PROGRAM LIKE WORD OR WORDPERFECT FOR ERRORS.

○ IF WE WRITE THE TEXT FOR YOU, SEND US ALL THE INFORMATION AND TEXT YOU CAN ABOUT THE PROPERTY. THE MORE INFORMATION WE HAVE THE EASIER IT IS TO WRITE ABOUT THE PROPERTY.

○ IF YOU ARE GOING TO CHARGE THE TOUR ON YOUR CREDIT CARD THEN HAVE IT READY.

ONCE YOU HAVE COLLECTED ALL OF THESE ITEMS, YOU ARE READY TO PLACE AND ORDER FOR YOUR TOUR.

TOURS.NET ○ SPOKANE, WA ○ PHONE (123)456-7890 ○ WEBMASTER@TOURS.NET ○

IT IS EASY

DECLARATION OF JOINT INVENTORS FOR PATENT APPLICATION

As the below named inventor, I hereby declare that:

My residence, post office address and citizenship are as stated below next to my name.

I believe I am the original, first and joint inventor of the subject matter which is claimed and for which a patent is sought on the invention entitled: Electronic Property Viewing System for Providing Virtual Tours Via a Public Communications Network, and a Method of Exchanging the Same, the specification of which is attached hereto.

I hereby state that I have reviewed and understand the contents of the above-identified specification, including the claims.

I acknowledge the duty to disclose information known to me to be material to patentability as defined in Title 37, Code of Federal Regulations §1.56.

PRIOR FOREIGN APPLICATIONS:

I hereby state that no applications for foreign patents or inventor's certificates have been filed prior to the date of execution of this declaration.

POWER OF ATTORNEY:

As a named Inventor, I hereby appoint the following attorneys and agent to prosecute this application and transact all business in the Patent and Trademark Office connected therewith: Richard J. St. John, Reg. No. 19,363; David P. Roberts, Reg. No. 23,032; Randy A. Gregory, Reg. No. 30,386; Mark S. Matkin, Reg. No. 32,268; James L. Price, Reg. No. 27,376; Deepak Malhotra, Reg. No. 33,560; Mark W. Hendricksen, Reg. No. 32,356; David G. Latwesen, Reg.

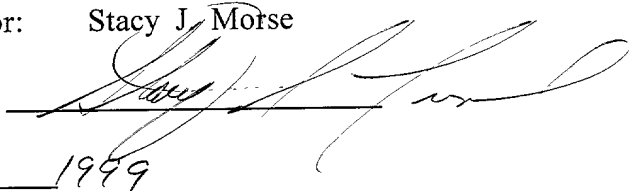

No. 38,533; George G. Grigel, Reg. No. 31,166; Keith D. Grzelak, Reg. No. 37,144; James D. Shaurette, Reg. No. 39,833; Frederick M. Fliegel, Reg. No. 36,138; Donald Brent Kenady, Reg. No. 40,045; and James E. Lake, Reg. No. 44,854.

Direct all communications to Mark W. Hendricksen, at WELLS, ST. JOHN, ROBERTS, GREGORY & MATKIN P.S., 601 W. First Avenue, Suite 1300, Spokane, WA 99201-3828. Telephone: (509) 624-4276; (PTO Customer No. 021567).

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statement may jeopardize the validity of the application or any patent issued therefrom.
